Education

College for Creative Studies in Transportation Design

FALL 2022, Detroit, MI

Bachelor of Fine Arts, graduated in May, 2025

Pukyong National University in Industrial Design

2019, Busan, Korea

Kyungsoo University in Economics and Logistics

2017 - 2018 Busan, Korea

Projects

Nissan Zen-Mobility

2026, Seoul, Korea

A mobile Zen Garden for busy office workers in 2050 Tokyo, designed to provide moments of rest and recovery on the move. Circadian-rhythm-based lighting, sound, massage, and other restorative features create a calming environment that enhances comfort and supports brief moments of relaxation and meditation during transit.

GM Dream Racer

2025, Detroit, MI

This is GM Sponsored Studio's 2040 performance car project. It's a next-generation racing concept designed for a future race track equipped with wireless charging and a rail system. The car allows drivers to experience both GT mode and Midship mode simultaneously, and enhances the driving excitement with a virtual booster effect.

Jeep Huntington

2025, Detroit, MI

This project is designed for younger couples who want to enjoy sunbathing and surfing anytime, without the need for preparation. The vehicle features a flexible roof system with rails-it functions as a roof while driving and transforms into a comfortable sunbed at the beach. It also includes a lightweight surfboard that doubles as a door in driving mode. This Jeep is always ready for an adventure under the sun, whenever you are.

Alfa romeo Hydrogenic

2024, Detroit, MI

This is the 2040 Alfa Romeo three-seater performance vehicle powered by hydrogen and solar energy. It features a compact battery and an integrated solar panel, contributing to reduced weight and enhancing the exotic driving experience.

Bentley Aurora

2023, Detroit, MI

A 2045 electric boat project inspired by the aurora—an exclusive phenomenon limited by time and place. Its flowing, organic forms are expressed in both exterior and interior, enhancing a sense of refined luxury.

Skills

2D (Visual Communication)

- Sketching / Marker Rendering / Adobe Photoshop / Adobe Illustrator / Adobe Premier

Zen - Mobility

2050 A mobile Zen garden for urban professionals

A Curating calm' in motion

■ Concept

A mobile Zen garden for busy urban professionals that transforms transit time into a restorative and mindful experience.

I Zen Mobility

The hardships of city workers

Overcrowded

Sensory Overload

Social Stress

Activity-Rest Imbalance

■ Problem & Solution

Name : Ayaka (28)

Location : Tokyo

Job : Marketing Manager

Problem : She experiences high levels of stress driven by excessive workload, lack of adequate rest, and overcrowded commuting environments.

Self-driving Mobility

UX/UI-driven
Circadian balance

Fresh Air

Reducing stress and enhancing wellness through circadian rhythm balance.

Zen Mobility

The UX/UI system provides users with brief moments of rest and restores harmony between body and environment during transit.

"My energy feels steady throughout the day!!"

I Zen Mobility

'Embraced'

Translating the embracing language of architecture into automotive form, the vehicle balances coziness with dynamic expression.

■ Direction A

■ Direction B

I Zen Mobility

'Oblique Polyform'

Shaped by the fusion of two cuboids, the vehicle evokes moving architecture, naturally blending into the urban landscape.

I Zen Mobility

'Interlocked'

Inspired by interlocking forms, the sketch explores a unified and cohesive body language.

■ Direction C

I Zen Mobility

Intake for Air Filter

'Interlocked'

A futuristic approach that fuses the original inspiration with a sleek, device-like aesthetic.

Direction C

I Zen Mobility

'Japanese Minimalism'

Preserving the essence of the inspiration, the design accentuates its inherent qualities through a simple and sleek form rooted in Japanese minimalism.

■ Direction C - Key Sketch

Intake for Air Filter

I Zen Mobility

1. Tail Ramp Graphic

Detail Exploration

'Pixel Gradient'

Gradient pixel patterns on the rear lamps and wheel covers create a distinctive expression of motion.

2. Wheel Graphic

I Zen Mobility

Inspired by Zen garden texture and layered architectural form.

■ Final EXT Design

Intake for Air Filter

I Zen Mobility

■ Final EXT Design

Inspired by Japanese Zen gardens, simplicity and stillness in motion bring calm and comfort to the busy everyday.

Zen Mobility

A specialized air filtration system delivers fresh, clean air, providing a refreshing and comfortable experience amid the polluted urban environment.

■ Final EXT Design

I Zen Mobility

Veiled Presence
Blurred Silhouette,
retain privacy, preserve calm.

■ The features of 'Shoji screen'

I Zen Mobility

■ Final EXT Design

A 'Moving Stillness'
Concealed wheels create a static
impression, emphasizing stability.

I Zen Mobility

■ User Scene

The upward-sliding door and retractable step enable effortless entry and exit in busy urban environments.

I Zen Mobility

■ User Scene

Shared Mobility

Trip Route

Current Location
Yokohama Red Brick Warehouse

Est. Fare ¥ 2,800

23 min (12.4 km)
Tolls & parking not included

Start This Trip

Provides busy urban professionals with quick and effortless mobility access.

Zen Mobility

O.A.L : 3,956 mm

O.A.W : 1,950 mm

O.A.H : 1,850 mm

W/B : 2,730 mm

Autonomous Level : 5

■ Dimension

I Zen Mobility

- Serenity
- Japanese Harmony [WA]
- Minimalism
- Warmth
- Privacy

Wooden-Layered Dashboard

■ Final INT Design

I Zen Mobility

'Framing the Essential'

Diffused light

Framing

Selective visibility

Selective revelation encourages a restful state by directing attention away from distractions and toward moments of calm.

■ The 'Shoji Windshield'

Holographic Display

目的地: 秋葉原
所要時間: 30分
口座: 25℃
天気: 晴れ

シートモード: リラックス
音源: Lo-Fi Jazz

NISSAN

I Zen Mobility

- Morning > Gentle awakening

- Lunch > A brief meditation

- Evening > Deep rest & recovery

■ The 'AI biological rhythm balancing'

Optimizes lighting, temperature, and ambient conditions according to the body's circadian rhythm for enhanced comfort and relaxation.

I Zen Mobility

'Warm Enclosure'

Inspired by Japanese Zen garden and traditional wooden architecture, a private sanctuary for finding calm within the city.

■ Final INT Design

2. Vent for Air Conditional & Air Filter

1. Wooden Center console & Main Controller

Zen Mobility

A word of traditional Japanese concept of harmony "Wa," the interior design and ergonomic layout are focused on maximizing comfort and relaxation.

'Ergonomic Comfort'

Warm linen and integrated massage create a soothing sense of comfort.

■ Functions

Enjoy a moment of stillness in your
moving Zen Garden.

 general motors | Dream Racer
2040 Shared track racing car

I Dream Racer

Name : Lucas

Age : 34

Income : \$ 200.000 / Year

Location: San Jose, California, U.S

Wants :

Lucas is a software developer who spends most of his weekdays in the office. He is now trying to balance his work and personal life.

Customer's Problem : Lucas recently became interested in car racing and wants to experience it, but he's hesitant due to strict traffic laws, limited driving skills, and the high cost of vehicles and maintenance.

GM Racing Experience Center in 2040

■ Problem & Solution

Solution : In 2040, General Motors operates a **Racing Experience Center** that allows users like Lucas to enjoy car racing through a monthly subscription, without having to purchase expensive racing cars. By showcasing the company's advanced technology, GM promotes its brand and generates revenue through subscription fees and various additional services. AI-equipped racing cars enhance the exotic racing experience while minimizing the risk of accidents.

I Dream Racer

■ Lucas's Journey Map

6. Maximize Exotic Racing
The booster effect provides explosive acceleration, maximizing the driver's exotic racing experience on the circuit.

7. Finish Successful Racing
After enjoying his first race, Lucas is looking forward to his next exciting race.

1. Start Racing
It's his first time trying a car race, and since he's unfamiliar with the track.

AI Driving Support

2. Support Driving
The AI-based UX/UI system supports and guides Lucas during his driving on the circuit.

UX/UI

4. Entertainment
The UX/UI system provides entertainment features, such as 'competitor' and 'chaser' modes, making the racing experience on the circuit feel more like a video game.

Wireless Charging

3. Wireless EV Charging
The wireless battery charging system frees the driver from manual charging and contributes to a lighter vehicle, enhancing the exotic driving experience.

Customizing

5. Driver Customized Setting
This car offers customizable settings, such as GT mode and Midship mode. The driver can select and adjust these settings based on personal preference.

Dream Racer

■ Dynamic Interaction

Dream Racer

Geometric Boldness is a design language that expresses three core elements of American design: simplicity, modernity, and straightforwardness.

■ Geometric Boldness

Dream Racer

Inspired by the ignition and ascent of a spacecraft, the 'Propulsive' design language expresses pure energy, acceleration, and a forward-driving spirit in the sports car.

■ Propulsive

Inspired by rocket launches, the fusion of geometric boldness with dynamic form emphasizes a futuristic vision and the high-performance spirit of a racing

Dream Racer

Dream Racer

Every design element of this vehicle serves a real function, contributing to the exotic racing experience—not just existing for appearance.

1. The front deployable spoilers help with downforce and braking.

2. The headlights are designed to help the aerodynamic of the vehicle.

■ Final Design

Dream Racer

The vehicle added entertainment elements such as video games to the track-only high-performance

■ Final Design

• Booster Effect

The booster effect brings a video game-like sensation to real-life racing, enhancing the driver's enjoyment.

Dream Racer

We all need to escape the seriousness and competitiveness of daily life from time to time. This vehicle offers the driver a sense of joy in response.

■ Final Design

Dream Racer

The rear design, inspired by a rocket launch, emphasizes the powerful output that this vehicle unleashes.

■ Final Design

Dream Racer

The rail structure located between the driver's seat base and the vehicle body enables the movement of the driver's seat.

Function

1. GT Mode (Rear Wheel Traction)

2. Formula Mode (All-Wheel Traction)
Cabin and Aeroparts is moving forward like a Formula Machine.

Dream Racer

The vehicle's unique canopy-style doors and lighting effects, rarely seen in everyday cars, offer drivers a sense of excitement and enjoyment.

1. Lighting Effect

The lights mounted on various sides of the vehicle provide visual enjoyment to both drivers and spectators through a range of effects.

2. Canopy-Type opening Door

The canopy-style door, inspired by a fighter jet cockpit, provides the driver with easy access and a sense of openness when the vehicle is at rest.

Function

Dream Racer

Dimension

Length : 4,651 mm

Width : 1,930 mm

Height : 1,048 mm

Wheelbase : 2,850 mm

■ Dimension

Dream Racer

The use of gradient paint evokes a sense of dynamic speed—making the car look as if it's racing forward, even at a standstill.

Jeep | Huntington

2040 Sunbathing Dating on your Jeep

1. Name : Jessica (26) / Brandon (31)
2. Location : Huntington beach, California
3. Job : Physical Therapy Assistant / Certified CrossFit Trainer
4. Pain Point : As an active couple who enjoys sunbathing, surfing, and off-road adventures, they often find that preparing for outdoor activities takes too much time and effort—packing gear, planning routes, and setting up once they arrive.

Enjoy Outdoor Adventure without Preparation!

Concept Explanation : Designed for young couples, this vehicle enables carefree beach drives and sunbathing anytime, with no preparation needed. While most leisure activities require extra spending, this leisure-optimized vehicle offers worry-free enjoyment without added costs.

Jeep®

Huntington

Inspired by a lightweight chair designed for sunbathing, the vehicle features a canvas top that functions as a roof while driving and transforms into a sunbed when parked on the beach.

Paper Mock Up

■ Ideation A (Windshield to Sunbed)

Jeep®

Huntington

Inspired by beach items such as surfboards and beach towels, the elevating rooftop made of canvas fabric offers users a comfortable and enjoyable sunbathing experience.

■ Ideation B (Elevating type Sunbed)

Elevating-Type Rooftop Railway

Jeep® Huntington

The main point of this page is that the directions for driving and sunbathing are different.

Driving Mode

Sunbathing mode

■ Ideation C (Chosen Theme)

Jeep®

Huntington

These development sketches show how sunbed concepts are incorporated into the vehicle's design.

■ Design Development

Jeep®

Huntington

Various design ideas are developed around the concept of combining driving and sunbathing experiences.

1. Sunbathing Mode
The flexible rooftop transforms into a sunbed.

2. Driving Mode
Surfboards are mounted on both sides of the vehicle and become integrated into the body when driving.

■ Design Refinement

Jeep
| Huntington

■ Final Design

Jeep® Huntington

Dimension

Length : 4,325 mm

Width : 2,327 mm

Height : 1,951 mm

Wheelbase : 3,192 mm

Autonomous Level : 5

■ Dimension

Sunbathing Mode

On the beach, User can make the flexible canvas top as a sunbed for enjoying sunbathing and take the surfing board from the side part for surfing.

Jeep
| Huntington

Terrain Mode

More than just a vehicle for on-road driving and sunbathing, it also excels at rock crawling and off-road performance.

■ Final Design

Surfing board
Storage

Air-Conditioner

Wide Curved Shape Monitor

Digital Side mirror Camera

Detachable Bluetooth Speaker

Roof-Rail

Glove Box & Surfing Board Holder

Interior Design

Inspired by surfboards, Jeep's seven-slot grille, this dashboard features a simple yet practical and iconic design.

Controller

Seven-Slot Grille

Surfing Board

Jeep®

I Huntington

Interior Design

Fabric and mesh grille sheets offer ventilation, enhancing comfort after outdoor activities like sunbathing, surfing, and swimming.

The detachable mesh grille cushion allows for effective ventilation, offering enhanced comfort after activities like swimming or intense physical movement and washable after use.

Jeep®

Huntington

For passengers who enjoy sunbathing in the vehicle, features like refrigerators and steering wheel hangers add essential comfort and convenience.

■ Function

1. Front Refrigerator

2. Hanger for Steering Wheel & Bags

Jeep® Huntington

The transition from a simple and intuitive three-step process to a sunbed is easy for any user to understand.

Sliding-Type Rail roof System

2-side Foldable Dashboard with Detachable Steering wheel

■ Sunbathing Mode

Step 1 : Slide the Rail Roof

Step 2 : Fold the seats and dashboard

Step 3 : Outspread the rail roof & Enjoy sunbathing

Jeep®

Huntington

In driving mode, the foldable surfboard serves as a vehicle door, and when detached, it can be used for surfing in the sea.

Function Idea Inspired by a girl running with a SurfBoard on the beach

■ Driving Mode

Door Grip &
Safety lashing

Door Hinge

This surfboard is made with high-strength materials and secure fixtures, ensuring reliable folding and full functionality as a surfboard.

Tail Fin

Thank you so Much

Jeep

Solaroid

The New 2040 hybrid Performance EV

Solaroid

Sport Driving

Nature & Sustainability

Family

Bianca (40), Fashion Model
Milano, Italy

Needs

- She wants a car that reflects her identity: artistic, bold, and future-oriented
- She desires Eco-friendly. She's done compromising between beauty and eco-consciousness
- She enjoys performance driving and wants to enjoy and share this thrill with her two kids

I Solaroid

■ Solution

The new 3 seaters Hybrid performance EV

■ Performance

■ Eco-friendly and highly efficient

■ Shared Thrill

Sculptural

Inspired by the bold and dimensional forms of sculptural speakers, the design expresses a futuristic identity with a strong and unmistakable character.

Direction A

This form gently echoes the silhouette of Alfa Romeo's iconic Quadrifoglio emblem within the side reflections, evoking a quiet homage to the brand's performance legacy.

Voluptuous

The design features a voluptuous form language, where flowing surfaces and generous volumes come together to create an emotional and sensuous presence.

■ Direction C

Cap-Forward Design

Dynamic Flow

The form, derived from a parallel slash motif, accentuates the vehicle's assertive performance and dynamic velocity through its precise and cutting contours.

■ Direction B

| Solaroid

■ Design Refinement

The final side view expresses a distinctive character through the poetic interplay of Alfa Romeo's signature voluptuous volumes and bold, futuristic

Alfa Romeo

| Solaroid

■ Design Refinement

The front and rear fascias explore a variety of sculptural experiments, aiming to create forms that are playful yet full of character.

Solaroid

Dimension
Length : 4,865 mm
Width : 2,200 mm
Height : 1,188 mm
Wheelbase : 3,191 mm
Seats : 3 Seats

■ Dimension

Solaroid

'Solaroid' is a new hybrid system that integrates a high-efficiency solar panel with a hydrogen cell, eliminating battery charging time and delivering high performance, with a lightweight structure that improves overall vehicle dynamics.

Solaroid

A captivating red finish, voluptuous volumes, and uniquely distinctive shapes come together to harmonize futurism with Alfa Romeo's timeless heritage.

The front fascia echoes Alfa Romeo's signature grille, evoking the brand's distinctive character.

■ Final Design

Solaroid

Two seamlessly flowing lines from front to rear emphasize both a sense of speed and the elegance of a smooth, continuous profile.

■ Final Design

Solaroid

The harmony between sharp lines, voluptuous volumes, and the advanced solar roof captures both the heritage and the future of Alfa Romeo.

Scissor doors inspired by the Alfa Romeo 33 Stradale

Solar Panel Roof

Hydrogen Tank

■ Functions

Touch-type Door handle

Solaroid

A design that embodies the famous principle 'form follows function' goes beyond mere aesthetic appeal, gaining its true allure through its actual performance.

Incorporating a flap-style brake design enhances braking efficiency and vehicle control.

■ Design Development

Flap-type brake spoiler

I Solaroid

Thank you so much
